

Living Legacy Forever Flowers

Where memories bloom

2026-2027

There are moments in life when we seek comfort, connection and meaning. At Centennial Park, Living Legacy Forever Flowers offers a gentle, beautiful way to honour a life by nurturing something living that continues to grow.

Living Legacy Forever Flowers creates a peaceful garden sanctuary, where memories bloom through nature and love is felt across the seasons.

A memorial that lives on

Each Living Legacy Forever Flowers memorial becomes part of a perennial garden, a place to visit, reflect and feel close again.

As flowers return each season, families find comfort in continuity, renewal and the beauty that remains. It is a legacy that grows alongside your memories, offering calm and connection over time.

A legacy that cares for the environment

Living Legacy Forever Flowers is thoughtfully designed to honour both life and the natural world. As South Australia's first sustainable living memorial, it uses a gentle, science-led process that allows ashes to be respectfully returned to the earth, nourishing the soil and supporting ongoing growth.

By choosing a memorial that blooms season after season, families contribute to a living landscape that nurtures biodiversity, reflects Centennial Park's commitment to environmental responsibility, and ensures each legacy gives back to the land it becomes part of.

What's included

Every Living Legacy Forever Flowers memorial thoughtfully includes:

- Perpetual interment right
- A personalised memorial plaque
- A reflective placement ceremony
- A crystal keepsake to hold close
- Perennial flowers that return year after year

\$9,200

Each element is designed to honour individuality, while creating a place of peace for families now and into the future.

Because some stories are meant to keep growing

If Living Legacy Forever Flowers feels like the right fit for your story, we invite you to explore the garden and learn more.
